**Subject:** planning for July 14-15

Colleagues

EPA and NIEHS are organizing a small workshop on July 14-15 in RTP, NC, to address the perceptions that current risk assessments are not public health protective; to identify areas of greatest uncertainty; and to discuss how study designs and data sets might be enhanced to address the key issues of species extrapolation, inter-individual variability, perinatal/lifestage susceptibility, exposure misclassification, etc... Proposals that could lead to joint EPA/NIEHS research initiatives would be particularly welcome. Planning for this workshop, scheduled for 14-

15 July, 2015, is being led by Jim Jones (Assistant Administrator for the Office of Chemical Safety and Pollution Prevention, EPA), Tom Burke (Science Advisor, EPA), and Linda Birnbaum (Director, NIEHS), so there is a high likelihood that actions will result from workshop recommendations.

We are very pleased that you have agreed to serve on a small planning committee to help identify additional workshop participants, further frame the issues, and recommend ways that the workshop could be best structured for success. Based on the Doodle poll most of you responded to, the best times for us to teleconference are March 20 (noon to 1:30pm EDT) and March 31<sup>st</sup> (noon to 1:30pm EDT). A calendar invite for these first two meetings will be sent to each of you. If you cannot make one or both of these planning calls, please email your reactions to the materials and minutes from the meeting and we will incorporate your input as best as possible.

On behalf of Tina, John and myself: thanks for your participation and support! We will be in touch soon with further details.

David
